---

# Data Center Tour

- The data center tour was conducted this morning
- For members who were not able to attend, the materials are provided at the meeting today
- The data center tour materials are also available on the King County Web Site

---

# SAC Role in County-Wide Initiatives

- The KC code requests SAC advice on planning and implementation of large countywide IT projects and policy-related transmittals, such as business cases

---

# SAC Involvement

- The CIO has been contacting external SAC members to solicit their assistance and support on some of the county-wide initiatives
- The work will be conducted through:
  - Sub-committee meetings
  - Member review and advice via e-mail, phone

# Calendar for Reviews/Advice

# Upcoming IT Initiatives

- The CIO will be contacting external SAC Members for their expert advice on:

County-Wide Initiatives	Objectives
Accessibility & Secure Access	Advice on how we could balance public expectations regarding easier access to information with how to be more vigilant in securing information from terrorists, hackers, and other criminal elements.
e-Government / e-Commerce	Advice on how we can improve the technology used to provide the public with access to information and services, since the public expects to easily find the information and conduct much of the traditional government transactions through e-Government/e-Commerce type services.
Revenue Generating	Advice on how we are considering other revenue-generating approaches through the use of technology.
Electronic Records and Document Management	Advice on how we address the need for efficient data records management and information exchange methodologies.

---

# Discussion

- Participants' comments, advice and commitments
